

Department of

Chemical and Environmental Engineering

2013—2014 Seminar Series

Friday November 15, 2013

9:30—10:30 AM

WCH 205/206

Michele Potter

Engineering Librarian

Raymond L. Orbach Science Library

UC Riverside

Professional Development Session

Join Michele Potter, the Engineering Librarian at UCR, to learn about what the UCR Libraries have to offer you as graduate students and to:

- Get an introduction to finding the types of information resources used in engineering research, including journal articles, conference proceedings, patents, standards, methods, books and more.
- Learn how to search a variety of systems such as Compendex, Water Resources Abstracts, Web of Science, and Google Scholar to quickly locate information on a variety of engineering topics.
- See a quick demonstration on how to use citation searching to find articles that cited particular articles.
- Get exposure to reference management software and how it can help you.
